

Banyo station accessibility upgrade

Project update - November 2024

The Banyo station accessibility upgrade is part of Queensland Rail's program to upgrade stations to make them accessible for everyone.

Project benefits

Banyo station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network. The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured, to access our trains with ease.

Construction progress

Major construction works have been progressing well at Banyo, with the major infrastructure components now installed. The following works have been completed recently:

- ✓ installation of staircases (pictured right)
- ✓ installation of platform structures and awnings
- ✓ associated drainage works
- ✓ platform concrete pours (more than 95 per cent complete)
- ✓ fit-out of footbridge and lift installation - ongoing (pictured over the page)
- ✓ installation of light poles, platform coping and tactile surface indicators.

Footbridge installation and fit-out

Works during a track closure, October 2024

Upcoming works

Customers and the community can expect to see the following activities on-site in the coming weeks:

- installation of roof sheeting
- continuing construction of station building, ticket office and entrances
- fit-out of footbridges, staircases and platforms
- continuing lift installation works.

Works will generally take place between 6am and 6pm Monday to Saturday, unless notified. Prior notification will be provided for after hours activities (nights, Sundays and public holidays).

Every effort will be made to carry out these works with respect for our neighbours and customers.

Alternative transport

Shuttle bus 316 continues to operate between Banyo and Northgate stations to keep customers moving during the station upgrade.

We appreciate the community's understanding while we work to build you a better Banyo station.
