

# Works notification

## Buranda UPDATE

### Why?

Queensland Rail will carry out early morning works as part of the Buranda station accessibility upgrade. The early morning works for the delivery and pouring of concrete are required to secure concrete supply and equipment bookings in addition to avoiding extreme weather conditions.

### When?

Early morning works will take place from 3:30am on the below dates. This is a change from the previously communicated dates, due to current wet weather.

- Monday 16 December
- Tuesday 17 December
- Wednesday 18 December.

Should early concrete pours not be achievable due to concrete supply availability, works may need to continue beyond the standard finishing time of 6pm in order to complete concrete works on the above days.

*Please note that the above dates are scheduled to the best of our ability and may change at short notice due to weather and construction/supply conditions.*

### Where?

Works will be occurring at Buranda station on the platform and within the station precinct.

### Impacts

Trucks, machinery and construction noise

Lighting towers at night

Early morning and late night works

Presence of concrete trucks and machinery

Every effort will be made to carry out these works with respect for our valued neighbours. We apologise for any inconvenience and thank you for your patience as we work to improve our network.

Works may be subject to change due to weather conditions and operational requirements.
