

Lindum station accessibility upgrade

Quarterly project update | July 2024

The Lindum station accessibility upgrade is part of the State Government's ongoing investment to upgrade stations to make them accessible for everyone.

Project benefits

Lindum station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network. The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured use the station with ease.

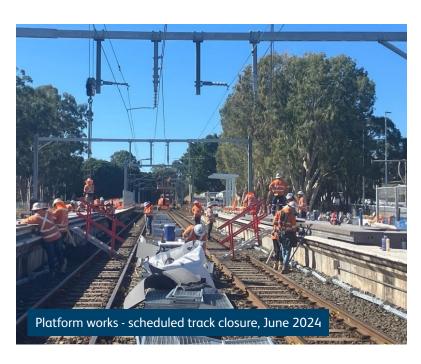

We look forward to reopening the station to customers, as soon as it is safe to do so, in the second-half of the year.

Construction progress

Major construction works have been progressing well on site. The following works have been undertaken recently at Lindum station:

- ✓ foundations (piling) platform extension
- ✓ installation of new footbridge sections (large crane operation)
- ✓ platform raising and installation of copes (edging and paving) pictured, right
- √ removal of old station building
- ✓ lift shafts (commenced)
- ✓ North Road park 'n' ride expansion works (in progress).

Upcoming works

In the coming months, you can expect to see the following activities on site:

- platform works (ongoing)
- footbridge fit-out (screens, glazing and electrical)
- · construction of new station building
- installation of lift shafts and lift car assembly
- North Road park 'n' ride expansion (ongoing).

Works will generally take place between 6am and 6pm Monday to Saturday, unless notified. Every effort will be made to carry out these works with respect for our neighbours and customers.

We thank you for your patience and cooperation while we build you a better Lindum station.

Alternative transport

Shuttle buses continue to operate between Lindum and Wynnum North stations to keep customers moving during the station upgrade.

We appreciate the community's understanding while we work to build you a better station.
