Lindum station accessibility upgrade

Project update - November 2024

The Lindum station accessibility upgrade is part of Queensland Rail's program to upgrade stations to make them accessible for everyone.

Project benefits

Lindum station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network. The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured, to access our trains with ease.

Construction progress

The following works have been undertaken recently at Lindum station:

✓ platform raising - concrete pours

✓ installation of platform canopy structures

✓ installation of footbridge staircases (pictured right)

✓ vegetation works throughout precinct

✓ construction of station building (pictured over the page)

✓ North Road park 'n' ride expansion works.

Installation of staircases

Upcoming works

Customers and the local community can expect to see the following activities in the coming weeks:

- continuing fit-out of footbridge, staircases and lift shafts (screens, glazing and lighting)

- continuing construction of station building, ticket office and entrance plazas

- lift car assembly

- North Road park 'n' ride expansion - drainage and entry works (Eccles Street).

Works will generally take place between 6am and 6pm Monday to Saturday, unless notified. Prior notification will be provided for after hours activities (nights, Sundays or public holidays).

Every effort will be made to carry out these works with respect for our neighbours and customers.

Alternative transport

Shuttle buses continue to operate between Lindum and Wynnum North stations to keep customers moving during the station upgrade.

We appreciate the community's understanding while we work to build you a better Lindum station.
