

Morningside station accessibility upgrade

PROJECT UPDATE – AUGUST 2024

The Morningside station accessibility upgrade is part of the State Government's ongoing investment to upgrade stations to make them accessible for everyone.

Project benefits

Morningside station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network.

The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured, use the station with ease.

Construction progress

Work has been progressing on site including:

- fitout of first two sections of the new footbridge
- commenced installation of the first lift
- commenced concrete pours for the new platforms.

Upcoming works

Customers and the local community can expect to see an increase in activity in the following weeks:

- ongoing civil works
- ongoing upgrade of the station building
- installation of the final sections of the new footbridge.

Works will generally take place between **6am and 6pm Monday to Saturday**, unless notified.

Every effort will be made to carry out these works with respect for our neighbours and customers.

Alternative transport

Shuttle bus 237 continues to operate between Morningside and Cannon Hill stations to keep customers moving during the station upgrade.

Community photo competition winner announced

Congratulations to Patricia Woods whose photo titled 'Bright Night' was selected as the image to be mounted in pride of place at Morningside station when the station reopens. Images of the local community add a vibrant touch to our community spaces.

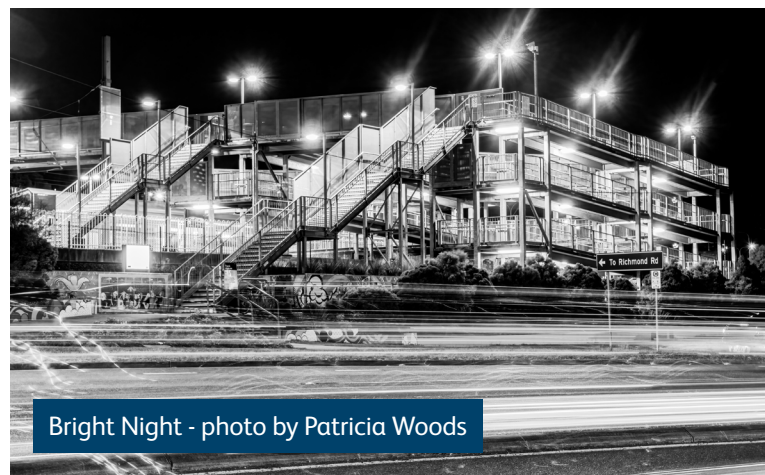

Thank you to all the entrants who submitted photos.
