

Morningside station accessibility upgrade

Quarterly project update | July 2024

The Morningside station accessibility upgrade is part of the State Government's ongoing investment to upgrade stations to make them accessible for everyone.

Project benefits

Morningside station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network. The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured use the station with ease.

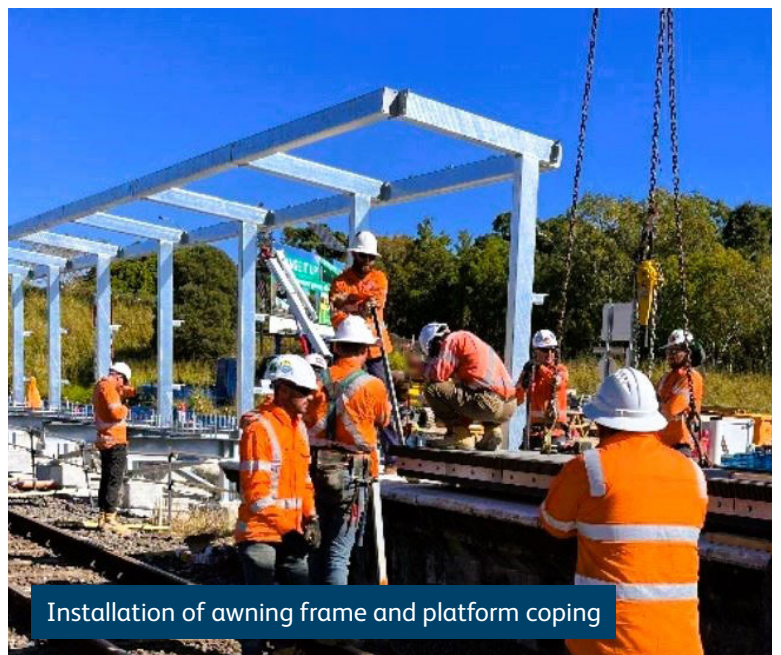

Construction progress

Recent weekend closures of the Cleveland line enabled the project team to work around the clock and make good progress while trains were not running on the network, including some of the more complex construction activities.

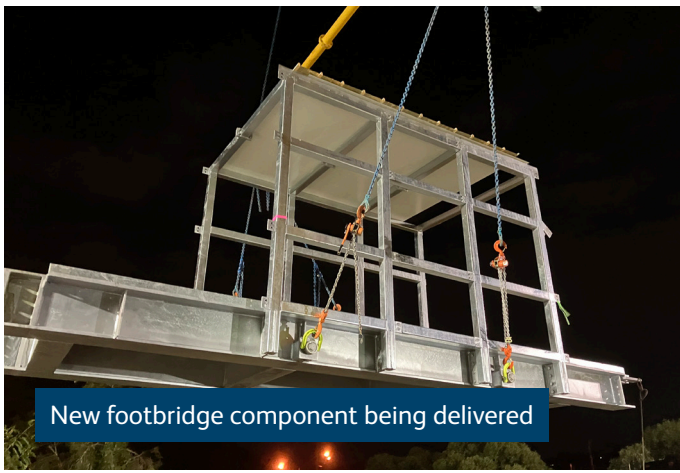

Works recently completed included the installation of:

- ✓ two sections of the new footbridge
- ✓ precast platform edge coping
- ✓ platform and shelter structures
- ✓ structural works for the Wynnum Road entry
- ✓ station services works.

If you are passing the station, you will now be able to see the upgrade starting to take shape.

Installation of awning frame and platform coping

Upcoming works

You can expect to see the following upcoming activities on site:

- upgrade of the station building and carparks
- completion of platforms and platform shelters
- installation of the final sections of the new footbridge
- construction of the new Wynnum Road entry plaza
- installation of the new lift cars.

Works will generally take place between 6am and 6pm Monday to Saturday, unless notified. Every effort will be made to carry out these works with respect for our neighbours and customers.

Alternative transport

Shuttle bus 237 continues to operate between Morningside and Cannon Hill stations to keep customers moving during the station upgrade.

We appreciate the community's understanding while we work to build you a better station.
