QUEENSLAND RAIL VALUES:

1 Queensland Rail - We do better together

Treat others with respect - We appreciate everyone's contributions and differences

Empower our people - We have confidence in our people

Act Safely - We work safe, to go home safe

Make a positive difference - We learn from today, to improve tomorrow

Position Purpose

Provide civil engineering services to support Queensland Rail in delivering quality, commercially focused civil engineering solutions across Network and other Queensland Rail Lines of Business.

Position Responsibilities

- 1. Provide civil engineering design and documentation services as part of commercially valuable and effective civil engineering solutions to Queensland Rail businesses.
- 2. Provide design and documentation for railway civil engineering infrastructure projects.
- Maximise commercial outcomes by initiating, developing and reinforcing strong stakeholder relationships and by applying high quality influencing, advocacy, resolution and communication (verbal and written) skills.
- 4. Take a central role as a specialist in a team of engineering professionals, including multi-disciplinary project-based teams to ensure delivery of effective and commercially valuable civil engineering solutions.
- Propose, develop and implement business improvements, technology development and innovation to generate commercial advantage and outcomes.
- 6. Meet the requirements of professional practice and/or the Quality Management System to provide consistent output of civil engineering services and advice, ensure compliance with safety, operational and environmental Legislation, regulations and practices.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;

Position Description

- Observe all legal and safety obligations of the organisation;
- Attend further training as required;
- Travel interstate and intrastate as required;
- Work outside normal working hours;
- Undergo annual performance appraisal.

What is the key selection criteria

- Substantial level of skill in delivering civil engineering solutions in several of the following fields to meet operational requirements and deliver commercial value to Queensland Rail through design, analysis and evaluation, asset management, infrastructure maintenance, construction and supervision, inspection/assessment/auditing, commissioning, and research and development.
- 2. Substantial skill in project and resource management, budgets and meeting deadlines to deliver business focused engineering solutions.
- 3. Substantial skills in relationship management and problem solving with multiple, diverse and often complex stakeholders.
- 4. Substantial skills in co-ordinating small teams in a project based environment that achieves commercial outcomes through continual improvement and innovation.
- 5. Substantial level of civil engineering skill in the context of a major infrastructure environment in several of the following fields: design, analysis and evaluation, asset management, infrastructure maintenance, construction and supervision, inspection/assessment/ auditing, commissioning, and research and development.
- 6. Substantial knowledge of the legal and regulatory environment applying to railway infrastructure projects.
- 7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
