## **Position Purpose**

To lead the assurance program for NGR, providing rollingstock technical advice and support and ensuring that all technical aspects of the fleet meet the relevant Queensland Rail standards and specifications.

## **Position Responsibilities**

1. Participate as a member of the NGR leadership team and strategic advice to ensure high level performance from the NGR fleet which also meet relevant Queensland Rail standards and specifications.
2. Lead, develop and manage a team of technical specialists which provide assurance activities and advice pertaining to the New Generation Rollingstock.
3. Apply an effective operational readiness and business as usual assurance program and framework which ensures NGR fleet are safe and delivered and operated to the required standards and specification.
4. Develop, refine and maintain suitable assurance processes, registers and interfaces to ensure timely and considered decision-making, accurate program reporting and comprehensive risk management.
5. Ensure effective levels of engagement with internal and external parties throughout NGR contract life.
6. Monitor and report on the agreed delivery schedules for NGR operational readiness and ensure the initiation of corrective action where required to achieve acceptable program timelines and outcomes.
7. Provide appropriate rollingstock engineering, operational and maintenance input and advice on NGR operational readiness programs as required.

## **Additional Factors**

- The appointee will be required to :-
- Comply with Queensland Rail's Code of Conduct;

- Observe all legal and safety obligations of the organisation;

### **What is the key selection criteria**

1. High level of skill in the leadership, management of a team of technical specialists and liaising with project managers.
2. High level of skill in the development and delivery of integrated rollingstock and contract assurance programs which ensure the safe, reliable rollingstock engineering, design and maintenance.
3. High level of skill in the planning and documentation of rollingstock projects applicable to rollingstock engineering and safety standards and specifications.
4. High level of communication, consultation, negotiation and engagement skills with a range of internal and external stakeholders and suppliers.
5. Extensive knowledge and experience in the planning and delivery of passenger transport services and infrastructure including customer service, operations, rollingstock and maintenance facilities.
6. Substantial knowledge of relevant policy and legislation impacting on the provision of rail services and infrastructure.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
