Position Purpose

As a member of the Major Projects The Wave project team be the key interface between Queensland Rail (QR) and Department of Transport and Main Roads (DTMR) and major contractors for the technical aspects of stations, buildings and facilities impacted by the Wave project and major project works.

Position Responsibilities

1. Act as a critical contributor to the delivery of station and facility works liaising with the relevant stakeholders, design and construction teams and DTMR, to identify any station and facility issues and work collaboratively to develop effective solutions.
2. Manage a complex range of stakeholder objectives and relationships including those with Department of Transport and Main Roads (DTMR), the contractors and Queensland Rail interfaces to successfully deliver The Wave and other relevant business areas of works within specified timeframes,approved budgets andprogram KRAs.
3. Act as the Queensland Rail representative in supporting decision-making and integration with the contractors being the interface between Queensland Rail and the relevant Contractors with respect to all relevant business areas of works ensuring any engineering, design, construction and handover related issues are identified and resolved.
4. Identify critical commissioning activities and ensure processes and resources are mobilised to expedite commissioning in a cost-effective manner.
5. Manage progress on Queensland Rail issues affecting the delivery program and act as the responsible point of escalation and/or mediation where risks arrive with the potential to adversely impact

a greater program of work.
6. Lead, on behalf of Queensland Rail, the contractor's delivery of handover and acceptance documentation and assurance program compliance for all below-rail assets delivered by the contractor, ensuring compliance with all applicable standards, legislation and Queensland Rail's obligations as a stakeholder and RTO.

Additional Factors

The appointee will be required to :-
- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria

1. Extensive knowledge and experience in delivery large scale complex integrated rail infrastructure projects.
2. High level of skill in the delivery of business focused technical/professional railway infrastructure solutions and an ability to implement strategies that mitigate risk.
3. High level of skill in interpreting engineering drawings, designs and documentation within tight deadlines including technical specifications and design drawings.
4. High level of interpersonal, communication, consultation, negotiation and influencing stakeholder skills to ensure the design and constructability review programs are adhered to with the ability to facilitate building strong relations across the business and with the Alliance partners.
5. High level of skill in interpreting statutory, regulatory and policy obligations, particularly in relation to satisfy the safety, environment, and contract process requirements in a commercially focused Alliance delivery model.
6. High level of skill in dealing with railway transport operations, construction, maintenance and safety standards.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
