Position Purpose

Lead and manage the successful delivery and integration of major rail infrastructure programs in alignment with industry best practices and standards, ensuring compliance with organisational and government stakeholder requirements in a complex operational environment.

Position Responsibilities

1. Participate as a member of the management team to provide leadership on key issues relating to the delivery and integration of the rail projects, in a dynamic and changing integrated passenger and rail infrastructure environment.
2. Provide leadership, technical and professional guidance to design, planning and delivery teams of the rail project, ensuring infrastructure interface and program of works are aligned in the relevant specifications and the design developed meets all Queensland Rail construction specifications, requirements and deliverables.
3. Lead and provide clear direction and development of the Queensland Rail programme of works to ensure delivery of results in a highly complex and diverse rail infrastructure environment.
4. Manage the delivery of the rail project in accordance with allocated budgets, project schedules, safety targets and business performance measures.
5. Anticipate and address potential significant safety, legal, environmental, and commercial risks associated with managing a large scale project.
6. Provide detailed reporting to key stakeholders outlining

progress against agreed deliverables including actual and potential variations to cost, time or quality and potential risks or issues with operational and enterprise-wide implications.

7. Manage relationships with key stakeholders and strategically influence decision making to drive beneficial outcomes for Queensland Rail, the Cross-River Rail Program and DTMR, ensuring continuous interface, communication and integration between the project partners/agencies and other key internal and external stakeholders in delivering key project milestones.
8. Work with enterprise project management frameworks and governance arrangements appropriate for multiple large-scale projects with significant touchpoints and stakeholder relationships across Queensland Rail.
9. Develop and implement engagement and communication strategies with both internal and external stakeholders to ensure project objectives are achieved.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria

1. High level of skill and proven experience in providing leadership and strategic of a complex major infrastructure projects from development to construction within a mega project and an Alliance environment.
2. Extensive knowledge of rail transport operations and associated legislation and organisational governance principles relating to the Rail Industry projects.
3. High level of skill in complex program management to optimise safety including understanding of commercial arrangements and contract negotiation and management and reporting within various delivery models.
4. High level skill using creativity and innovation in driving change to support the delivery of a changed Rail environment.
5. High level of influencing, interpersonal, consultation, relationship building and negotiation skills that build and sustain productive relationships and partnerships.
6. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
