Position Purpose

As a member of the Queensland Rail Wave Project Team provide leadership ensuring effective engineering capability and efficient delivery process through the life cycle of the project (Design, Renewals, Implementation, Testing and Commissioning). This role will support the successful delivery of the Wave project integrating with broader operational and maintenance activities of Queensland Rail's Network business.

Position Responsibilities

1. Lead the provision of expert tunnel engineering services, advice, and recommendations to complete projects against specified KRAs, taking into account scope, quality and safety considerations, allocated budgets and time frame to deliver valuable commercial outcomes.
2. Lead and coach individuals and teams in delivering commercial advantage and outcomes through business improvements, technology development and innovation.
3. Ensure each project team demonstrates professional integrity and good business approach to tunnel engineering products delivered to meet operational requirements and deliver valuable commercial outcomes.
4. Provide guidance, as a professional engineer, for tunnel engineering works and monitor and manage compliance of the team with the requirements of professional practice and the Quality Management System to provide consistent output of tunnel engineering services, ensure compliance with safety, operational and environmental legislation, regulations and practices.
5. Establish and maintain relationships with internal and external stakeholders to facilitate effective tunnel strategies and governance procedures and where applicable, build capability.

Position Description

6. Actively promote and contribute to the achievement of project objectives and targets including providing a high level of customer service to internal and external customers; and work with relevant project stakeholders and external organisations through cooperation and teamwork.
7. Collaborate with key internal and external stakeholders in order to obtain advice and guidance relating to tunnel initiatives and activities to provide the best possible advice and support to the Wave project.
8. Achieve the Wave targets, objectives, performance measures, safety responsibilities and continually seek to implement business performance improvement initiatives.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria

1. High level of skill in Design, Renewals, Implementation, Testing and Commissioning of tunnel infrastructure.
2. High level of skill in leading and developing a team of professional engineers and technical officers.
3. High level of skill in the delivery of business focused technical tunnel engineering solutions that deliver commercial value in at least one area of tunnel discipline.
4. High level of skill in coaching and leading multi-disciplinary project teams to deliver sustainable commercial outcomes within a complex regulatory environment.
5. High level of skill in delivering commercial advantage and outcomes through business improvements, technology development and innovation.
6. High level of skill in meeting statutory, regulatory and policy obligations, particularly in relation to satisfy the safety, environment, contract processes and human resource requirements in a commercially focused business.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Value and Behaviours.
