QUEENSLAND RAIL VALUES:

1 Queensland Rail - We do better together
Treat others with respect - We appreciate everyone's contributions and differences
Empower our people - We have confidence in our people
Act Safely - We work safe, to go home safe
Make a positive difference - We learn from today, to improve tomorrow

Position Purpose

Lead and manage the successful delivery of all station upgrades within the Logan and Gold Coast (LGC) Rail Alliance package for the Logan and Gold Coast (LGC) Faster Rail project. Ensure station works are delivered in accordance with industry best practices, Queensland Rail, and Department of Transport and Main Road (DTMR) requirements, while maintaining integration with broader rail infrastructure works.

Position Responsibilities

1. Lead and manage the successful delivery of all station upgrade works within the LGC Rail Alliance package for the Logan and Gold Coast Faster Rail project, ensuring compliance with Queensland Rail and DTMR requirements.
2. Provide leadership, technical and professional guidance to station design, planning, and delivery teams, ensuring that station infrastructure interfaces align with LGC Rail Alliance project specifications and operational requirements.
3. Oversee the station construction program within a complex brownfields rail environment, ensuring safe and efficient project execution in coordination with other LGC Rail Alliance works.
4. Manage the station upgrade works within allocated budgets, schedules, and safety targets, ensuring all deliverables meet LGC Rail Alliance project performance measures.
5. Identify and mitigate station-specific safety, legal, environmental, and commercial risks associated with working in operational rail environments under the LGC Rail Alliance.
6. Provide detailed reporting on station progress, including any variations to scope, cost, or schedule, and escalate critical issues as required within the LGC Rail Alliance governance structure.
7. Develop and maintain strong relationships with stakeholders involved

Position Description

in station infrastructure, including passenger experience teams, accessibility groups, and operational staff, ensuring alignment with LGC Rail Alliance objectives.

8. Ensure seamless integration between station upgrades and broader rail infrastructure works within the LGC Rail Alliance, maintaining alignment with the program-wide delivery strategy.
9. Act as the key escalation point for station-related issues, ensuring prompt resolution of risks and challenges impacting station delivery under the LGC Rail Alliance framework.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria

1. High level of skill in leading and providing strategic direction for the delivery of station upgrade projects within a major rail infrastructure environment, from design through to construction.
2. Extensive knowledge of rail transport operations and associated legislation, with a strong understanding of station-specific infrastructure requirements and governance principles for rail projects.
3. High level of skill in program and project management to optimise safety, quality, and cost-effectiveness in station construction and delivery, including commercial arrangements, contract negotiation, and reporting within alliance-based delivery models.
4. High level of skill in driving change and innovation within station design and construction to support the delivery of modern, passenger-centric rail infrastructure.
5. High level of skill in stakeholder engagement, consultation, and negotiation to influence decision-making and maintain strong relationships with internal and external stakeholders involved in station delivery, including passenger experience and accessibility groups.
6. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.

Health, Safety and Environment Responsibilities

Comply with the overarching document called Health, Safety and Environment Responsibilities MD-11-6843 located in the Safety and Environment Management System.
