Position Purpose

Provide leadership to ensure effective engineering capability and efficient delivery processes throughout the full project lifecycle including design, renewals, implementation, testing, and commissioning. This role supports the successful delivery of integrated rail infrastructure projects while aligning with broader operational and maintenance activities across Queensland Rail's Network business.

Position Responsibilities

1. Lead the provision of expert track and civil engineering services, advice, and recommendations to complete The Wave Brownfield Alliance in accordance with the project requirements, agreed scope, quality and safety considerations, the allocated budgets and time frames to deliver the project.
2. Maximise quality outcomes for Queensland Rail by coaching and supporting teams to manage stakeholder relationships effectively and communicate with positive impact.
3. Lead and mentor individuals and teams to drive business improvements, technology innovation, and commercial advantage across engineering delivery.
4. Ensure project teams demonstrate professional integrity and sound business practices in the delivery of track and civil engineering products that meet operational requirements and contribute to commercial outcomes.
5. Provide professional engineering guidance for track and civil works, and oversee team compliance with professional standards and the Quality Management System to ensure consistent, safe, and regulation-compliant outputs.
6. Establish and maintain strong relationships with internal and external stakeholders to facilitate effective engineering strategies,

Position Description

- governance procedures and where applicable, capability development.
7. Actively promote and contribute to the achievement of project objectives and performance targets, delivering high levels of customer service to both internal and external stakeholders through collaboration and teamwork.
 8. Collaborate with key stakeholders to obtain expert advice and guidance on track and civil engineering initiatives, ensuring optimal support for project delivery.
 9. Achieve the project targets and objectives, performance measures, Safety responsibilities, and performance measures, while continuously seeking opportunities for business performance improvement.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria

1. High level of skill in Design, Renewals, Implementation, Testing and Commissioning of (HV Traction / Signalling / Track and Civil / Telecommunications) infrastructure.
2. High level of skill in leading and developing a team of professional engineers and technical officers.
3. High level of skill in the delivery of business focused technical track and civil engineering solutions that deliver commercial value in at least one area of track and civil discipline.
4. High level of skill in coaching and leading multi-disciplinary project teams to deliver sustainable commercial outcomes within a complex regulatory environment.
5. High level of skill in delivering commercial advantage and outcomes through business improvements, technology development and innovation.
6. High level of skill in meeting statutory, regulatory and policy obligations, particularly in relation to satisfy the safety, environment, contract processes and human resource requirements in a commercially focused business.
