QUEENSLAND RAIL VALUES:

1 Queensland Rail - We do better together
Treat others with respect - We appreciate everyone's contributions and differences
Empower our people - We have confidence in our people
Act Safely - We work safe, to go home safe
Make a positive difference - We learn from today, to improve tomorrow

Position Purpose

To provide engineering services and business support, delivering quality, commercially focused engineering solutions supporting the Alliance in relation to Telecoms and Operations System installation across the LGC project. This role will be embedded with the LGC Rail Alliance.

Position Responsibilities

1. Provide engineering advice and technical support for railway operational systems, including design, construction, testing and commissioning.
2. Develop project plans including scopes of work, programs, risk management plans, budgets, quality plans, materials, resources and staff requirements in consultation with all stakeholders.
3. Supervise and check work of technical staff assigned to the same project in the office or the field.
4. Monitor the implementation of project activities in relation to progress against planned works particularly the areas of cost, time and quality.
5. Communicate with internal and external staff regarding technical issues and provide technical support for the day-to-day construction activities.
6. Provide project progress reports to Senior Management, with emphasis on actual and potential variations to cost, time and quality.
7. Finalise project activities, including quality and completion sign-offs, closure of project financial systems, project audits and review and preparation of final project reports to Senior Management.
8. Meet the requirements of professional practice and/or the Quality Management System to provide consistent output of engineering services and advice, ensuring compliance with safety, operational and

Position Description

environmental Legislation, regulations and practices.
