Position Purpose

To provide technical support, workplace coaching, training and assessment in the installation, maintenance and repair of all signalling systems and equipment. To perform inspections and report on the condition of signalling equipment and the effectiveness of maintenance.

Position Responsibilities

1. Provide technical support to Network staff.
2. Conduct workplace coaching/training and workplace assessment against competency standards of field staff.
3. Progress the implementation and application of quality principles and practices through implementing quality procedures relating to the maintenance of signalling systems.
4. Conduct technical inspections and audits of the asset and report on the condition of the asset and the effectiveness of the maintenance.
5. Investigate and report on signalling system incidents, failures and performance anomalies.
6. Carry out the testing, commissioning and maintenance of signalling equipment.
7. Monitor equipment performance and recommend improvement initiatives.
8. Maintain all records and associated documentation relating to asset condition, maintenance programs and costing systems.

Additional Factors

The appointee will be required to :-

- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;
- Be available for call out/standby duties, overtime and higher grade relief as required;
- Be available to work away from home station and travel as

Position Description

- required;
- Undertake further training considered necessary for the effective performance of the duties associated with the position and career development;
- Work in a semi-autonomous manner within broad guidelines.

What is the key selection criteria

1. Substantial knowledge of signalling systems and equipment and the relevant maintenance standards and safe working principles.
2. Substantial level of skill in maintenance, fault rectification and installation of signalling systems and equipment.
3. Substantial skill in identifying equipment performance irregularities within the signalling equipment network, investigating reoccurring faults and recommending improvement initiatives.
4. Substantial interpersonal, written and oral communication skills.
5. Sound level of skill in the development of procedures for the maintenance of electrical signalling systems and equipment.
6. Sound knowledge of Workplace Health and Safety Act and relevant Queensland Rail safety policies and procedures.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
