Position Purpose

Act as a proactive partner between the Telecommunications Engineering and major projects to build capability and support the successful execution of interface activities, share specialist information and report on risks, barriers and mitigation.

Position Responsibilities

1. Provide a clear and consistent Telecoms Engineering interface to the MPI Program.
2. Assist the integrated planning, implementation, and deployment of various Telecommunications Engineering systems in support of the MPI and capital works Program.
3. Provide oversight and alignment to the various intra-Telecoms technical teams to ensure cross system harmonics and efficiencies for work relating to the MPI and capital works program.
4. Act as the interface with Major Project Integration to assist in the identification of inter-discipline dependencies, deficiencies, conflicts, risks and opportunities that arises from the integrated plan.
5. Identify, assess and report on risks and opportunities pertinent to Telecoms in relation to the MPI and capital works Program and vice versa communicate findings to the project teams and make recommendations where possible to mitigate risks.
6. Monitor and report on Business Readiness requirements and milestones pertinent to Telecoms in relation to the MPI and capital works Program.
7. Provide regular reports on the progress of testing and deployment, that identifies risks, barriers and mitigation.
8. Accountability for the planning and delivery of Queensland Rail works, including works delivered by internal Queensland Rail teams

and suppliers directly engage by Queensland Rail.

Additional Factors
The appointee will be required to :-
- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

What is the key selection criteria
1. High level of conceptual, analytical, and problem-solving skills to enable the identification of risks, issues and opportunities.
2. High level of interpersonal, negotiation and communication skills with the ability to work effectively with a diverse range of stakeholders and sustain project relationships and partnerships.
3. Substantial knowledge of Telecoms Engineering systems and its interfaces and roles in the business. Such as Train Control Systems, Passenger Information Systems, CCTV, Data Networks, Power Supervisory System, Station Systems and Radio Systems.
4. Substantial knowledge of Telecoms technologies and standards.
5. Substantial level of skill in the management of teams of technical specialists, coordinators, and project managers.
6. Substantial knowledge of procurement processes, contract administration and design requirement associated with project works in Queensland Rail.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
