Position Purpose

To lead Operational Services personnel in the on site installation of Trackside Systems equipment leading the safety of operations, work outputs of the team and the quality of works performed and ensuring the safe and effective operation of the rail network.

Position Responsibilities

1. Lead the on site installation, maintenance and repair of Trackside Systems equipment in accordance with predefined work programs to ensure the safe and effective operation of the rail network systems.
2. Ensure all work is performed in accordance with Workplace Health and Safety (WH&S) requirements and legislative policies including work activities performed by subordinate employees.
3. Implement, co-ordinate and manage worksite safe working protection in accordance with Queensland Rail Standards.
4. Implement, co-ordinate and manage environmental protection in accordance with Queensland Rail Standards.
5. Ensure all work is performed in accordance with technical and operational specifications and standards including work activities performed by subordinate employees.
6. Maintain all records and associated documentation relating to quality of works performed, Inspection and Test plans, and costing systems.
7. Report on actual work performed against the scheduled work program, and report any equipment performance and condition irregularities.
8. Progress the implementation and application of work procedures and practices in pursuit of ensuring continuous quality improvement.

Additional Factors

The appointee will be required to :-
- Comply with Queensland Rail's Code of Conduct;

Position Description

- Observe all legal and safety obligations of the organisation;
- Be available for call out/standby duties, overtime and higher grade relief as required;
- Be available to work away from home station and travel as required;
- Undertake further training considered necessary for the effective performance of the duties associated with the position and career development;
- Work in a semi-autonomous manner within broad guidelines.

What is the key selection criteria

1. Substantial knowledge of all types of mechanical signalling equipment and their relevant maintenance and installation standards.
2. Substantial level of skill in the installation, repair and maintenance of mechanical signalling equipment to predetermined standards and procedures.
3. Substantial skill in the supervision of staff and work activities.
4. Sound knowledge of the WH&S Act and relevant Queensland Rail safety policies and procedures.
5. Sound interpersonal, oral and written communication skills.
6. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
