QUEENSLAND RAIL VALUES:

1 Queensland Rail - We do better together
Treat others with respect - We appreciate everyone's contributions and differences
Empower our people - We have confidence in our people
Act Safely - We work safe, to go home safe
Make a positive difference - We learn from today, to improve tomorrow

Position Purpose

To effectively supervise and direct personnel carrying out the installation of signalling systems and equipment ensuring the safety of site operations, productivity requirements and quality of works.

Position Responsibilities

1. Supervise the installation of signalling systems ensuring signalling system safety and integrity during all phases of construction.
2. Lead a team to deliver signalling installations in accordance with defined project schedules and within project time constraints, reporting regularly on project progress.
3. Ensure that the installation of signal systems and equipment is carried out in accordance with the relevant standards, practices and procedures.
4. Verify quality by certifying relevant project documentation requirements including Inspection and Test Plans, AS3000 installation compliance and general signalling test certificates.
5. Implement and ensure compliance with Principal Contractor site project safety requirements.
6. Assist with the generation of signal take off lists and project materials requirements to allow installation works to be carried out to program.
7. Carry out the testing, commissioning and fault rectification of signalling equipment.
8. Repair and adjust mechanical signalling equipment as required.

Additional Factors

The appointee will be required to :-
- Comply with Queensland Rail's Code of Conduct;
- Observe all legal and safety obligations of the organisation;

Position Description

- Be available for call out/standby duties, overtime and higher grade relief as required;
- Be available to work away from home station and travel as required;
- Undertake further training considered necessary for the effective performance of the duties associated with the position and career development;
- Work in a semi-autonomous manner within broad guidelines.

What is the key selection criteria

1. Substantial knowledge of signalling systems and equipment and the relevant construction standards and safe working principles.
2. Substantial level of skill in construction, installation and fault rectification of signalling systems and equipment.
3. Substantial level of skill in the supervision of staff, work activities and resources.
4. Substantial interpersonal, written and oral communication skills.
5. Sound level of skill in the development of procedures for the construction of signalling systems and equipment.
6. Sound knowledge of Workplace Health and Safety Act and relevant Queensland Rail safety policies and procedures.
7. Knowledge of and willingness to commit to and work within Queensland Rail's Values and Behaviours.
